About Me

I've always been a computer geek ever since I was seven years old. My journey into the world of programming started when I was fifteen, and I discovered the magic of bringing ideas to life with a few lines of code. From my first "Hello World" application, I knew I had found my passion. Software development is not just a job for me; it's an exciting challenge that keeps me learning and pushing my limits every day. Below, you'll find projects I've completed that showcase my skills and dedication to creating high-quality software.

Technical Projects

Astral Eats

https://astraleats.vercel.app/
https://github.com/PabloAzadian/astraleats

- Built a JavaScript/React website that allows users to order "Alien" food to their home planets. This project focuses on delivering a user-friendly experience with intuitive navigation and visually appealing images created using Midjourney AI. Key features include responsive design, dynamic content rendering, and seamless integration with a mock backend.

KenoTech

https://keno-tech.vercel.app/
https://github.com/PabloAzadian/KenoTech

- Developed a hardware store ecommerce platform using JavaScript and React. The platform features a clean and responsive design, intuitive product search and filtering, a secure checkout process, and a comprehensive user account management system. This project showcases my ability to build functional ecommerce solutions with efficient state management and API integration.

Education

Computer Science (1 year)
Feb 2020 - Feb 2021

Facultad de Ingenieria UdelaR

Bachelor's in Video Game Development (1 year)
Apr 2021 - Feb 2022

Academia a+ Uruguay

Reactjs Front-End Developer Course
Dec 2022 - Sep 2023

https://www.codecademy.com/profiles/pabloazadian
